

SAMMANSTÄLLNING AV PATIENT AND PUBLIC INVOLVEMENT IN RESEARCH COURSE EVALUATION

Please find below, a short course evaluation survey. It is really helpful to hear your feedback on the course so we can continue to improve the course in the future.

1. How satisfied are you with the course in general?

¹ Neither satisfied nor dissatisfied

2. How do you perceive the general level of involvement of the teachers in the course? (*Medel = 5,0, SD = 0,0*) (*1 = Uninvolved, 5 = Involved*)

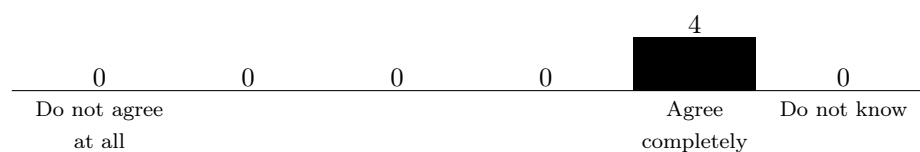

KOMMENTAR

- Very knowledgeable teachers with lots of experience and helpful examples to guide our learning [5]
- Excellent work from both Joanne and Chelsea. [5]

3. How do you perceive the quality of teaching?

4. The teachers used helpful examples and illustrations to clarify the material as needed. (*Medel = 5,0, SD = 0,0*) (*1 = Do not agree at all, 5 = Agree completely*)

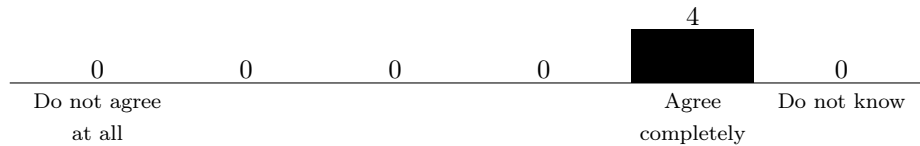

KOMMENTAR

Inga kommentarer givna

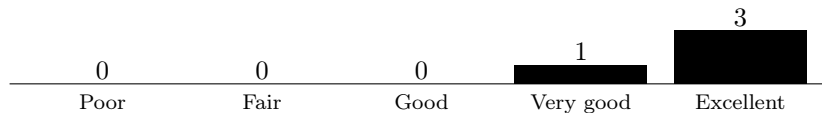

5. During the seminars, the activity based learning (class discussions, debates, peer reviewing etc) facilitated my ability to apply the knowledge gained during the course into my own research (*Medel = 5,0, SD = 0,0*) (*1 = Do not agree at all, 5 = Agree completely*)

KOMMENTAR

Inga kommentarer givna

6. How do you perceive the relevance of the reading material?

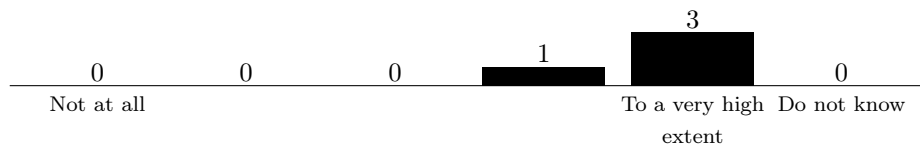

7. How do you perceive the relevance of the films?

8. Below you find the learning outcomes of the course. To what extent do you feel that you have achieved the course goals? To be able to: (*1 = Not at all, 5 = To a very high extent*)

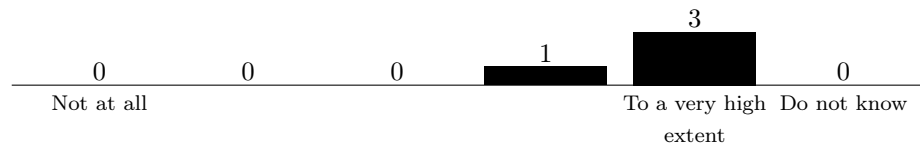

- a. Explain what PPI is, what it is not, and its empirical basis (*Medel = 4,8, SD = 0,4*)

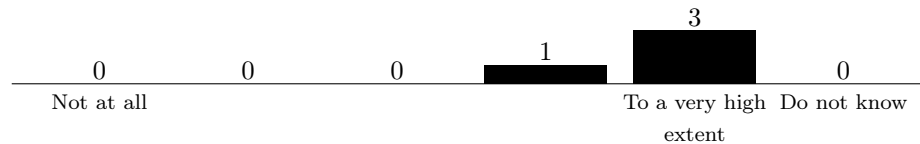

- b. Define and differentiate between different levels of PPI (*Medel = 4,8, SD = 0,4*)

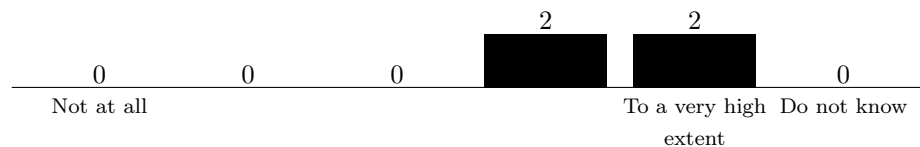

- c. Apply existing frameworks and guidance's for conducting PPI and develop an understanding of ethical considerations (*Medel = 4,8, SD = 0,4*)

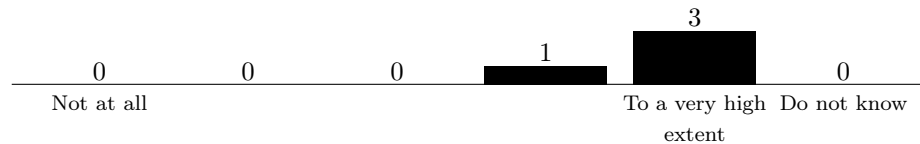

d. Practically apply PPI throughout the research cycle ($Medel = 4,8, SD = 0,4$)

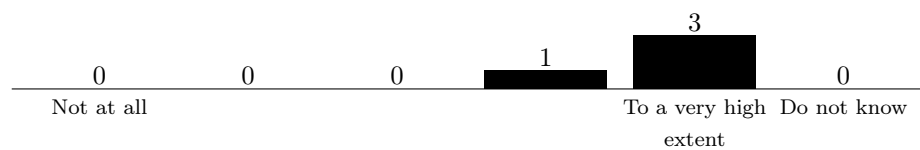

e. Identify and apply appropriate tools to facilitate PPI ($Medel = 4,5, SD = 0,5$)

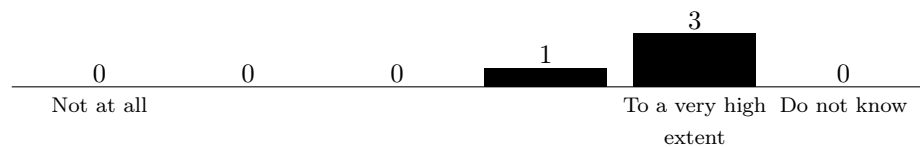

f. Identify barriers and facilitators for PPI and reflect on how they may overcome barriers and utilise facilitators ($Medel = 4,8, SD = 0,4$)

g. Critically evaluate the impact of using PPI in their research ($Medel = 4,8, SD = 0,4$)

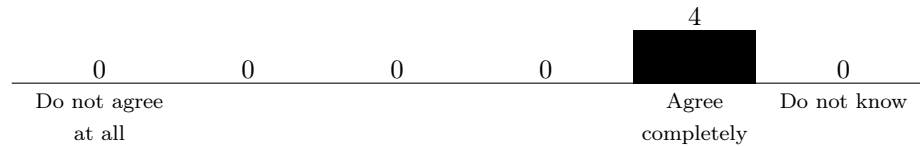

h. Identify and apply approaches to evaluate the impact of PPI in their own research ($Medel = 4,8, SD = 0,4$)

KOMMENTAR

9. I would recommend the course to other PhD students ($Medel = 5,0, SD = 0,0$) (1 = Do not agree at all, 5 = Agree completely)

KOMMENTAR

- As this field is not so developed in the Swedish context, I feel like it would be appropriate for everyone, from all different fields, to take part of this course. [5]
- Already have! [5]

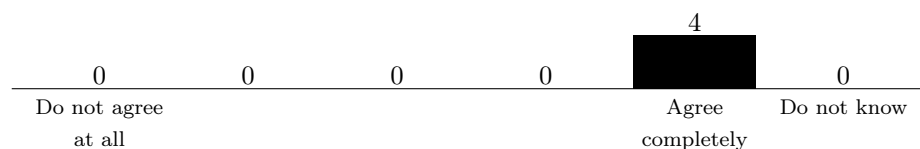

10. What elements of the course were most valuable to you?

- The general discussions in class, presentation by the teachers, and the practical discussions of our own research projects.
- The combination of good literature and rewarding discussions.
- Every section of the course
- The knowledge how to perform PPI in the lab was valuable to me.

11. What suggestions do you have to improve the course in the future?

- I think everything was good but maybe to have a little bit more time for lectures and intertwine these lectures with discussion and questions
- If I have to say something, maybe work out some technical issues?
- It is better to continue in this way
- As a PhD working at lab, I would like learn more about PPI in lab.

12. The administration of the course (schedule, examination, registration, information etc.) has functioned well throughout (*Medel = 5,0, SD = 0,0*) (*1 = Do not agree at all, 5 = Agree completely*)

13. How did you find out about the course?

- Through the uppsala university phd course site, as well as in discussion with my supervisor.
- Both word of mouth and internal communications within the university.
- It is a well organized course
- From college course website

14. Do you have any other comments about the course?

- I had a great time during the course and in discussions with the teachers and my classmates. Thank you for a well though out and educating course!
- Thank you for an excellent course!
- The teachers were perfect! They can be my model!! Proud of your pedagogical approach.
- No.
